

Pali Institute

::: School Goals :::

Individuals who attend Pali will express...

1) Increased Understanding of Relevant Science Concepts

Pali Institute's hands-on, experiential learning techniques will help students to retain science concepts relevant to California state science content standards.

2) Increased Awareness of Personal Growth

Students who participate in leadership and teambuilding courses will express an increase in self-confidence, connectedness, and communication with their classmates.

3) Increased Awareness of Group Dynamics

Group dynamics will be influenced in a positive and constructive manner and long-term differences will be noted amongst teachers, parents, and the students themselves.

4) Preparedness and Confidence in our Program.

Students, teachers, and parents will feel adequately informed and will enjoy and think highly of the program and we will continue to meet all other standards applicable for a residential and experiential program (Association for Experiential Education standards, challenge course standards).
